

System **D** BULKHEAD

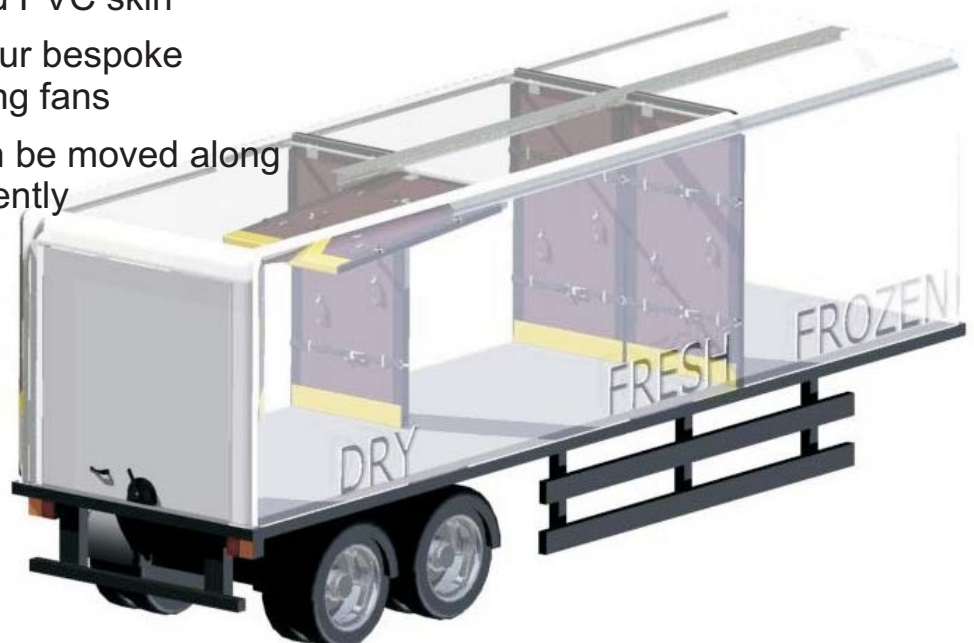

System 'D' - 'The flexible bulkhead designed to fit'

System D is a leap forward in flexible bulkhead technology. Primarily designed for the popular "split" configuration, which is now favoured by the UK's leading supermarkets, it can also be supplied as 1 piece, bi-fold or plug.

Normally a 50/50 split, this makes the SYSTEM D driver and loader friendly, effectively halving the effort to open and close - particularly with the all stainless steel Lift & Stow device.

- Lightweight construction
- Flexible - for durability
- New core eliminates sagging
- Waterproof materials throughout
- Hygienic and easy to clean
- Extra tough bonded PVC skin
- Multi-options for your bespoke application, including fans
- Split bulkheads can be moved along the body independently

LIFT & STOW - *'easy lifting and lowering for your bulkhead'*

Working in conjunction with leading fleet engineers, J R Mobile now offer a simple lifting and lowering device.

Ergonomic design, using high quality marine grade components, housed in a robust stainless steel fabrication, has resulted in an answer to this problem.

Using a 10mm diameter braid polyester rope, the movement of the bulkhead requires minimum effort.

When not in use this can be stowed into its bungee carrier.
